### MARKET COMMENTARY

Physical spot iron ore quotes for 62% fines were relatively stable this morning, and firmed up as the DCE closed. Traders in Shandong refused to sell PB Fines with prices below 475 yuan/mt. In Tangshan, PB Fines traded around 505 yuan/mt. Most traders said that, though iron ore prices do not appear bullish, growing prices of rebar could provide some support. Iron ore prices could remain volatile in the short term

#### IRON ORE DOMESTIC CONCENTRATE INDEX CALCULATION METHODOLOGY

The compilation method for price index generally refers to the compilation method of CPI price index and other price indices, breakdown the price data and calculate the average value according to a certain method, taking the vertical axis as the regional composite index (average of different grade index) and the horizontal axis as the grade composite index (average of different regional index), a total composite index for domestic ore can be output ultimately. The process system is also adopted in the calculation i.e. each sub-index can be obtained as well.

|            | IRON ORE PORT INDEX NORMALISATION DIFFERENTIALS   |           |        |                  |                  |                |  |  |  |  |
