IRON ORE SEABORNE INDEX (IOSI)

MARKET COMMENTARY

November 18th, 2019		CFR Qingdao, USD/dry tonne							This morning, physical iron ore port stock quotes rose 5-10yuan/mt, though some traders held off in hope of better pricing in the new few days. Mills inquiries were tepid today. According to SMM, current mills stock in plants keep declining and some mills are likely to be restocking in the near future. Iron ore supply pressure have eased. SMM's calculations show that mill profits for rebar have risen to 700-800yuan/mt based on an iron ore price of 83USD/mt, which will likely help boost mill operating rates.

IRON ORE INDEX SPECIFICATIONS, COMPILATION RATIONALE AND DATA EXCLUSIONS

Iron Ore Index Specifications (Port and Seaborne)					Iron Ore Index Compilation Rationale and Data Exclusions
	65% Fe Fines	62% Fe Fines	58% Fe Fines	62.5% Fe Lump	MMi iron ore indices are compiled from data provided by companies that are part of the iron ore supply chain and involved in spot market transactions. The indices are calculated using detailed transaction-level data submitted to MMi by these companies. This data is normalised to the appropriate specifications and screened to remove outliers before volume-weighted average prices are calculated from the remaining core set of data. For more details on MMi's iron ore methodology please download the guide published on our website at: www.mmiprices.com
Fe %	65.00	62.00	58.00	62.50	
Alumina %	1.40	2.25	2.25	1.50

IRON ORE DOMESTIC CONCENTRATE INDEX CALCULATION METHODOLOGY

The compilation method for price index generally refers to the compilation method of CPI price index and other price indices, breakdown the price data and calculate the average value according to a certain method, taking the vertical axis as the regional composite index (average of different grade index) and the horizontal axis as the grade composite index (average of different regional index), a total composite index for domestic ore can be output ultimately. The process system is also adopted in the calculation i.e. each sub-index can be obtained as well.
