## IRON ORE SEABORNE INDEX (IOSI)

## MARKET COMMENTARY

Mar 11th, 2025		CFR Qingdao, USD/dry tonne							Today, DCE iron ore futures opened lower but closed higher, with the most-traded I2505 contract finally settling at 774.5 yuan/mt, down 0.06% for the day. Traders showed moderate enthusiasm for selling; steel mills purchased as needed, with limited inquiries; and the market transaction atmosphere remained sluggish. In Shandong, the mainstream transaction prices for P8 fines were around 775 yuan/mt, basically stable compared to yesterday's prices. In Tangshan, P8 fines transaction prices were around 780-785 yuan/mt, also stable compared to yesterday.							
Index	Fe Content	Price	Change	Change %	MTD	YTD	Low <sup>2</sup>	High <sup>2</sup>	This week, the blast furnace maintenance impact tracked by SMM was 1.5882 million mt, down 25,600 mt WoW. Pig iron production is expected to increase slightly, with next week's estimated blast furnace maintenance impact at 1.3874 million mt, down 200,800 mt WoW. Pig iron production has been continuously increasing, with the growth rate expanding, providing support for ore prices. However, macro sentiment remains pessimistic, posing significant resistance to upward movement in ore prices. Attention should be paid to end-use demand; if the data

## IRON ORE INDEX SPECIFICATIONS, COMPILATION RATIONALE AND DATA EXCLUSIONS

Iron Ore Index Specifications (Port and Seaborne)					Iron Ore Index Compilation Rationale and Data Exclusions
	<b>65% Fe Fines</b>	<b>62% Fe Fines</b>	<b>58% Fe Fines</b>	<b>62.5% Fe Lump</b>	<p>MMi iron ore indices are compiled from data provided by companies that are part of the iron ore supply chain and involved in spot market transactions. The indices are calculated using detailed transaction-level data submitted to MMi by these companies. This data is normalised to the appropriate specifications and screened to remove outliers before volume-weighted average prices are calculated from the remaining core set of data.</p> <p>For more details on MMi's iron ore methodology please download the guide published on our website at: <a href="http://www.mmiprices.com">www.mmiprices.com</a></p>

## IRON ORE DOMESTIC CONCENTRATE INDEX CALCULATION METHODOLOGY

The compilation method for price index generally refers to the compilation method of CPI price index and other price indices, breakdown the price data and calculate the average value according to a certain method, taking the vertical axis as the regional composite index (average of different grade index) and the horizontal axis as the grade composite index (average of different regional index), a total composite index for domestic ore can be output ultimately. The process system is also adopted in the calculation i.e. each sub-index can be obtained as well.
