MARKET COMMENTARY

DCE iron ore futures rose largely today, the main contract closed 849.5, an increase of 2.72% throughout the day. The market trading sentiment is warming up, with decent shipping sentiment among traders. On the steel mill side, there is an increased willingness to purchase, leading to an overall improvement in market transactions compared to previous periods. In Shandong, the transaction price for PB powder is in the range of 830-835 yuan/ton, while in Tangshan, the transaction price is 840-845 yuan/ton, representing an increase of 15-20 yuan/ton compared to the previous day. In recent days, terminal demand has shown signs of improvement, with increasing trading volume in building materials. Today's data on building materials show a slight rebound, and rebar inventory is decreasing, leading

	65% Fe Fines	62% Fe Fines	58% Fe Fines	62.5% Fe Lump																					
Fe %	65.00	62.00	58.00	62.50	MMi iron ore indices are compiled from data provided by companies that are part of the iron ore supply chain and involved in spot market transactions. The indices are calculated using detailed transaction-level data submitted to MMi by these companies. This data is normalised to the appropriate specifications and screened to remove outliers before volume-weighted average prices are calculated from the remaining core set of data. For more details on MMi's iron ore methodology please download the guide published on our website at: www.mmiprices.com

IRON ORE DOMESTIC CONCENTRATE INDEX CALCULATION METHODOLOGY

The compilation method for price index generally refers to the compilation method of CPI price index and other price indices, breakdown the price data and calculate the average value according to a certain method, taking the vertical axis as the regional composite index (average of different grade index) and the horizontal axis as the grade composite index (average of different regional index), a total composite index for domestic ore can be output ultimately. The process system is also adopted in the calculation i.e. each sub-index can be obtained as well.
