IRON ORE SEABORNE INDEX (IOSI)

MARKET COMMENTARY

Dec 11th, 2024		CFR Qingdao, USD/dry tonne							Today, the iron ore market underwent a contract rollover, with the most-traded contract switching to the I2505 contract. It remained stable in the morning but slightly declined in the afternoon. Throughout the day, it fluctuated downward, ultimately closing at 802, with a daily drop of 0.8% percentage points MoM. The daily pig iron production of the sample steel mills was 2.3625 million mt, down 47,500 mt MoM. Recently, due to environmental protection-driven production restrictions in Hebei, many blast furnaces in steel mills have been shut down, leading to a significant decline in pig iron production. This has caused iron ore prices to fluctuate downward. Considering that important meetings are still being held recently, the downward space for iron ore is relatively limited. Attention should be paid to the impact of economic meeting content on market sentiment.							
Index	Fe Content	Price	Change	Change %	MTD	YTD	Low ²	High ²	According to an SMM survey, on December 11, the operating rate of blast furnaces in 242 steel mills surveyed by SMM was 86.23%, down 2.71 percentage points MoM. The mainstream transaction prices for PB Fines were 790-795 yuan/mt, down 5 yuan/mt from yesterday; in Tangshan, the transaction prices for PB Fines were 800-805 yuan/mt, also down 5 yuan/mt from yesterday.							
IOSI62	62% Fe Fines	109.48	-0.13	-0.12%	104.10	115.36	89.79	142.65	According to an SMM survey, on December 11, the operating rate of blast furnaces in 242 steel mills surveyed by SMM was 86.23%, down 2.71 percentage points MoM. IRON ORE DOMESTIC CONCENTRATE INDEX CALCULATION METHODOLOGY

The compilation method for price index generally refers to the compilation method of CPI price index and other price indices, breakdown the price data and calculate the average value according to a certain method, taking the vertical axis as the regional composite index (average of different grade index) and the horizontal axis as the grade composite index (average of different regional index), a total composite index for domestic ore can be output ultimately. The process system is also adopted in the calculation i.e. each sub-index can be obtained as well.
